

Rosenberg - Nitrile gloves

Rosenberg -Nitrile Gloves

Description:

Sturdy, tear-resistant disposable nitrile gloves for professional use. Disposable use as medical disposable gloves, chemicals protection gloves, food and restaurants, cosmetics.

Layer thickness: 5 mil. approx. 0.13 mm, which is stronger than many other nitrile gloves (approx. 0.09 mm), therefore more tear resistant. For thinner gloves, 2 pieces are often put on one above the other in practice (double consumption = double costs), which is not necessary with Rosenberg.

- Reinforced at fingertips and cuff for improved grip and higher stability (do not tear as quickly).
- Nitrile, free of natural latex, phthalate-free.
- Unpowdered, minimizes particulate contamination, when products should not be contaminated.
- Medical use according to EN455 (PPE), but not sterile for surgical use.
- Protects against contact with chemicals and chemical splashes for short periods.
- Ambidextrous use.
- Tight fit.
- Length: Size S = approx. 230 mm.
- Color: blue.
- Rolled edge.
- Suitable for food, approved for contact with food.
- CE certified (Europe)
- FDA certified (USA, Canada, Latin America).

Available sizes: S M L XL. 1 box contains 100 pieces (50 pairs).
